## Make the most of your investment

### ► The power of compounding

Compounding can be a powerful tool in wealth creation. Reinvesting distributions can be one of the easiest and cheapest ways to increase your holdings over time. You're compounding your investment's growth by continually adding more units which, in turn, will generate distributions of their own.

#### Why not reinvest your quarterly distributions?

### ► The benefits of making it regular

Making regular contributions to your investment can both grow your investment and smooth the effects of market highs and lows.

#### Why not add a Regular Savings Plan to your investment? Establish one from as little as \$50 per month.

You can also use BPAY<sup>®</sup> to add to your investment at any time with as little as \$500. See your statement for your BPAY reference number.

### Footnotes

1. Fund performance figures are calculated before tax and after fees and costs; using withdrawal prices and assumes distributions are reinvested. Past performance is not an indication of future performance.
2. The benchmark for this Fund is 50% Bloomberg Barclays Global Aggregate Index (\$A Hedged) and 50% Bloomberg AusBond Composite 0+ Yr Index (previously known as UBS Composite Bond Index 0+ ).
3. 'Morningstar Rating' is an assessment of a fund's past performance - based on both return and risk - which shows how similar investments compare with their competitors. A high rating alone is insufficient basis for an investment decision. 'Morningstar Category Rank' is the Fund's performance rank relative to all funds in the same Morningstar Category. Investments are placed into Morningstar Categories based on their compositions and portfolio statistics so that investors can make meaningful comparisons.
