

## Monthly fund update - November 2017

### Investment approach

Each Fund provides access to a selection of high quality, specialist active and index investment managers across a variety of asset classes via its underlying investments. The investment portfolios provide access to investments which have been constructed in a manner that Sandhurst believes will meet the investment return objective of each Fund. Each Fund aims to provide a total return after fees in excess of a stated percentage above inflation over a full market cycle (typically 7 to 10 years), where inflation is measured by the Australian Consumer Price Index (CPI).

### Fund performance<sup>1</sup>

as at 30 Nov 2017

	3 months %	1 year %	3 years %p.a.	5 years %p.a.	Since inception %p.a.

Fund start date	7 June 2002
Return objective	CPI + 3.5%
Recommended investment timeframe	5 years +
Risk level	Medium to high

### Make the most of your investment

You only need \$500 to start an investment in one of our Sandhurst Diversified Funds

#### ► The power of compounding

Compounding can be a powerful tool in wealth creation. Reinvesting distributions can be one of the easiest and cheapest ways to increase your holdings over time. You're compounding your investment's growth by continually adding more units which, in turn, will generate distributions of their own.

**Why not reinvest your half yearly distributions?**

#### ► The benefits of making it regular

Making regular contributions to your investment can both grow your investment and smooth the effects of market highs and lows.

**Why not add a Regular Savings Plan to your investment?** You can establish one from as little as \$50 per month.

You can also use BPAY® to add to your investment at any time with as little as \$100. See your statement for your BPAY reference number.

## Asset allocation
