A word from the Fund's Investment Manager

The Fund's short term investment rates decreased during the quarter, reflecting market movements. The Reserve Bank of Australia (RBA) has left the official Cash Rate unchanged over the quarter at 1.50%. The RBA noted an improvement in the domestic terms of trade as a result of higher commodity prices and a pickup in Gross Domestic Produce (GDP) growth during the December quarter was offset by subdued wage pressure. The build-up of risk associated with the housing market and risks posed by the level of household debt resulted in the RBA leaving rates unchanged. The Fund has experienced strong investor growth during the quarter. The Fund has benefited from the recent increase in lending rates due to its exposure to mortgage backed securities.
