Sandhurst Select Mortgage Fund

Minimum initial investment and minimum holding \$2,000.

The Indicative Rate is an indication of the likely return of the fund for the quarter (net of fees and costs). This is calculated by careful analysis of the fund's projected investment income and by considering factors such as forecast interest rates and the portfolio mix of assets in the fund. Sandhurst may change the indicative rate for the quarter at any time (for example, due to unexpected market conditions).

The indicative rate is not guaranteed. The actual rate of return paid to investors at the end of each quarter is determined by the amount of income earned by the fund (net of fees and costs). The actual rate paid may be more or less than the indicative rate.

Indicative rate as at 1 July 2017 for the quarter ending 30 September 2017 (net of all fees and costs).
